

## Unkempt Property

Neglect of residential property and open storage of junk are public nuisances. Property that is abandoned or lacks adequate maintenance is a hazard to the public health. Open storage of vehicle parts, or vehicles in defective condition, can become habitat for animals and insects and constitute a threat to public safety.

Proper care and maintenance of private property fosters good will in the community and among neighbors. Your cooperation in working to clean up our homes, yards and terraces will be greatly appreciated by all.
