

Mosquito Control

Iowa Department of Public Health has recommended the following activities to help control the mosquito population in our community:

- Eliminate standing water
- Remove mosquito breeding grounds, such as appliances, tires, junk vehicles and empty containers, from outdoor locations
- Control the growth of weeds, grass, vines, brush and other vegetation
- Keep rain gutters clean and unclogged

For more information, contact the City Office at 472-2553 or at city@rockrapids.net.
