TITLE I

7. RECORDS. The council shall maintain records of its proceedings.
(Code of Iowa, Sec. 372.13(5))

9.02 EXERCISE OF POWER. The council shall exercise a power only by the passage of a motion, a resolution, an amendment, or an ordinance. The minutes shall show the results of each vote taken and information sufficient to indicate the vote of each member present. The vote of each member present shall be made public at open session. Such powers shall be exercised as follows:

1. APPROVED ACTION BY COUNCIL. Passage of an ordinance, amendment, or resolution requires an affirmative vote of not less than a majority of all the council members. A resolution must be adopted to spend public funds in excess of one-hundred thousand dollars (\$100,000) on any one project, or to accept public improvements and facilities upon their completion, and requires an affirmative vote of not less than a majority of all the council members. Each councilperson's vote on an ordinance, amendment, or resolution must be recorded. A measure which fails to receive sufficient votes for passage shall be considered defeated.

As used in this chapter, "all of the members of the council" refers to all of the seats of the council including a vacant seat and a seat where the member is absent, but does not include a seat where the council member declines to vote by reason of a conflict of interest.

A measure voted upon is not invalid by reason of a conflict of interest in a member of the council, unless the vote of the member of the council was decisive to passage of the measure. The vote must be computed on the basis of the number of members not disqualified by reason of conflict of interest. However, a majority of all members is required for a quorum. For the purpose of this section, the statement of a council member that the council member declines to vote by reason of conflict of interest is conclusive and must be entered of record.

(Code of Iowa, Sec. 380.4)

2. OVERRIDING MAYOR'S VETO. Within thirty (30) days after the mayor's veto, the council may repass the ordinance or resolution by a vote of not less than two-thirds (2/3) of the council members; and the ordinance or resolution becomes effective upon repassage and publication.
(Code of Iowa, Sec. 380.6(2))

TITLE I

3. MEASURES BECOME EFFECTIVE. Measures passed by the council, other than motions, become effective in one of the following ways:

- a. If the mayor signs the measure, a resolution becomes effective immediately upon signing; and an ordinance or amendment becomes a law when published, unless a subsequent effective date is provided within the measure.

(Code of Iowa, Sec. 380.6(1))

- b. If the mayor vetoes a measure and the council repasses the same measure after the mayor's veto, a resolution becomes effective immediately upon repassage; and an ordinance or amendment becomes a law when published, unless a subsequent effective date is provided within the measure.

(Code of Iowa, Sec. 380.6(2))

- c. If the mayor takes no action on the measure, a resolution becomes effective fourteen (14) days after the date of passage; and an ordinance or amendment becomes a law when published, but not sooner than fourteen (14) days after the day of passage, unless a subsequent effective date is provided within the measure.

(Code of Iowa, Sec. 380.6(3))

- d. A motion becomes effective immediately upon passage of the motion by the Council.

(Code of Iowa, Sec. 380.6)

9.03 COUNCIL COMMITTEES. The mayor shall appoint any council standing committees established by council resolution, and any special committees of the council. The standing committees shall consist of two council members; the first named shall be chairman. The mayor shall name the chairman of special committees and such other members as he deems appropriate. The mayor shall be an ex-official member of each committee. The regular meetings of the council shall be on the second and fourth Monday of each month at 5:30 p.m. in the Forester Community Center. If such a day falls on a legal holiday and City Hall is scheduled to be closed, the meeting is held the next day at the same time unless a different day or time is determined by the Council.

TITLE I

2. SPECIAL MEETINGS. Special meetings shall be held upon call of the mayor or upon the written request of a majority of the members of the council submitted to the clerk. Notice of a special meeting shall specify the date, time, place, and subject of the meeting; and such notice shall be given personally or left at the usual place of residence of each member of the council. 5. RULES OF PROCEDURE. The council shall determine the rules of its own proceedings by resolution, and the clerk shall keep such rules on file for public inspection.
(Code of Iowa, Sec. 372.13(5))
- 9.05 ELIGIBILITY FOR APPOINTMENT. A councilman is not eligible for appointment to any city office if the office has been created or the compensation of the office has been increased during the term for which he is elected.
(Code of Iowa, Sec. 372.13(9))
- 9.06 COMPENSATION. The salary of each council member shall be thirty-five dollars (\$35.00) for each official council meeting attended.

- 9.08 SERVING AS CHIEF OF VOLUNTEER FIRE DEPARTMENT. TITLE I

- 9.09 GENDER BALANCE. All appointive boards, commissions, and committees shall be gender balanced. No person shall be appointed or reappointed to any board, commission, or committee if that appointment or reappointment would cause the number of members of the board, commission, committee, or council of one gender to be greater than one-half the membership of the board, commission, or committee plus one if the board, commission, or committee is composed of an odd number of members. If the board, commission, or committee is composed of an even number of members, not more than one-half of the membership shall be of one gender. If there are multiple appointing authorities for a board, commission or committee they shall consult each other to avoid a violation of this section.

All appointive boards, commissions, and committees of the City, if not otherwise provided by law, shall be gender balanced as provided in this section unless the City has made a good faith effort to appoint a qualified person to fill a vacancy on a board, commission, or committee in compliance with this section for a period of three months but has been unable to make a compliant appointment. In complying with the requirements of this section, the City shall utilize a fair and unbiased method of selecting the best qualified applicants. Upon approval, selected backfill material, at the proper moisture content, shall be placed around the pipe in six (6) inch lifts and thoroughly compacted with approved mechanical tampers until the top of the pipe is covered with eighteen (18) inches of compacted dirt. No frozen material, except approved fill gravel, will be permitted for backfill trenches. The remainder of the backfill material, free from boulders larger than six (6) inches, wood, or organic material, shall be placed in uniform layers of not more than twelve (12) inches thickness and thoroughly compacted with approved mechanical tampers until the trench has been filled to the bottom of the pavement base. The plumber must maintain the affected area in good repair to the satisfaction of the city council for one year after refilling. If the

plumber is assessed, he must pay the costs before he can receive another permit, and the plumber's bond shall be security for the assessment. If the property owner is assessed, such assessment shall be collected with and in the same manner as general property taxes.

- 17.20 CASH BOND FOR CUTTING PAVEMENT. Before a permit shall be granted for any work which involves the cutting of street pavement whether it be asphaltic concrete or Portland cement concrete, the applicant shall give to the clerk a cash bond of fifty (50) dollars. Barriers shall be set within area designated for the sidewalk café, to ensure a minimum of four feet of sidewalk width clear of obstructions.

Such problems and conflicts may arise from, but are not limited to, scheduled festivals and similar events, parades or marches, repairs to the street or sidewalk, or from demonstrations or emergencies occurring in the area. To the extent possible, the permittee shall be given prior written notice of any time period during which the operation of the sidewalk café will be prohibited by the city, but any failure to give prior written notice shall not affect the right and power of the city to prohibit the café's operation at any particular time.

10. Permit Required. A sidewalk café may only operate with a valid permit from the City.

A. Findings and conditions. In connection with granting approval for any sidewalk café permit, the city administrator shall make findings that the proposed operation meets the limitations of this subsection, and the city administrator may impose such conditions in granting approval as are needed to assure that the proposed operation will meet the operating requirements and conditions set forth in this article, and to assure that the public safety and welfare will be protected.

8.03—Floodplain Management Standards
8.04—Administration

8.05—Nonconforming Uses
8.08—Definitions

8.06—Penalties For Violation

8.01—STATUTORY AUTHORITY, FINDINGS OF FACT AND PURPOSE.

A.—The Legislature of the State of Iowa has in Chapter 364, Code of Iowa, as amended, delegated the power to cities to exercise any power and perform any function it deems appropriate to protect and preserve the rights, privileges and property of the City or of its residents, and to preserve and improve the peace, safety, health, welfare, comfort and convenience of its residents.

B.—Findings of Fact

- 1.—The flood hazard areas of the City of Rock Rapids are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.
- 2.—These flood losses, hazards, and related adverse effects are caused by: (i) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.

C.—Statement of Purpose

It is the purpose of this Ordinance to protect and preserve the rights, privileges and property of the City of Rock Rapids and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in Section IB1 of this Ordinance with provisions designed to:

TITLE VI

- ~~1. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.~~
- ~~2. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.~~
- ~~3. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.~~
- ~~4. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.~~

~~8.02 GENERAL PROVISIONS:~~

~~A. Lands to Which Ordinance Apply~~

~~The provisions of this Ordinance shall apply to all lands and uses which have significant flood hazards. The Flood Insurance Rate Map (FIRM), dated May 2, 1991, which were prepared as part of the City of Rock Rapids Flood Insurance Study, shall be used to identify such flood hazard areas and all areas shown thereon to be within the boundaries of the 100-year flood shall be considered as having significant flood hazards. Where uncertainty exists with respect to the precise location of the 100-year flood boundary, the location shall be determined on the basis of the 100-year flood elevation at the particular site in question. The City of Rock Rapids Flood Insurance Study is hereby adopted by reference and is made a part of this ordinance for the purpose of administering floodplain management regulations.~~

~~B. Compliance~~

~~No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this Ordinance and other applicable regulations which apply to uses within the jurisdiction of this Ordinance.~~

~~C. Abrogation and Greater Restrictions~~

~~It is not intended by this Ordinance to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this Ordinance imposes greater restrictions, the provision of this Ordinance shall prevail. All other ordinances inconsistent with this Ordinance are hereby repealed to the extent of the inconsistency only.~~

TITLE VI

D.—Interpretation

~~In their interpretation and application, the provisions of this Ordinance shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.~~

E.—Warning and Disclaimer of Liability

~~The standards required by this Ordinance are considered reasonable for regulatory purposes. This Ordinance does not imply that areas outside the designated areas of significant flood hazard will be free from flooding or flood damages. This Ordinance shall not create liability on the part of the City of Rock Rapids or any officer or employee thereof for any flood damages that from reliance on this Ordinance or any administrative decision lawfully made thereunder.~~

F.—Severability

~~If any section, clause, provision or portion of this Ordinance is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this Ordinance shall not be affected thereby.~~

8.03 — FLOODPLAIN MANAGEMENT STANDARDS.

A.—General Floodplain Standards

~~All uses must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where 100-year flood data has not been provided in the Flood Insurance Study, the Iowa Department of Natural Resources shall be contacted to determine (i) whether the land involved is either wholly or partly within the floodway or floodway fringe and (ii) the 100-year flood level. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.~~

1. — All development within the areas of significant flood hazard shall:

- a. — ~~Be consistent with the need to minimize flood damage.~~
- b. — ~~Use construction methods and practices that will minimize flood damage.~~
- c. — ~~Use construction materials and utility equipment that are resistant to flood damage.~~

TITLE VI

- d. Obtain all other necessary permits from federal, state and local governmental agencies including approval when required from the Iowa Department of Natural Resources.

- 2. Residential buildings — All new or substantially improved residential structures shall have the lowest floor, including basement, elevated a minimum of one (1) foot above the 100-year flood level. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the 100-year flood level and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers) may be allowed subject to favorable consideration by the City Council, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding.

All new residential structures shall be provided with a means of access which will be passable by wheeled vehicles during the 100-year flood.

- 3. Non-residential buildings — All new or substantially improved non-residential buildings shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the 100-year flood level, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 100-year flood; and that the structure, below the 100-year flood level is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to National Geodetic Vertical Datum) to which any structures are floodproofed shall be maintained by the Administrator.

- 4. All new and substantially improved structures:

- a. Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:

TITLE VI

- (1) ~~A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.~~
- (2) ~~The bottom of all openings shall be no higher than one foot above grade.~~
- (3) ~~Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.~~

~~Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.~~

- b. ~~New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.~~
 - e. ~~New and substantially improved structures must be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.~~
5. ~~Factory-built homes:~~
- a. ~~All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the 100-year flood level.~~
 - b. ~~All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.~~
6. ~~Utility and Sanitary Systems:~~
- a. ~~On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.~~

TITLE VI

- ~~b. All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the 100-year flood elevation.~~
- ~~e. New or replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot above the 100-year flood elevation.~~
- ~~d. Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood-damaged or impaired systems.~~
- ~~7. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the 100-year flood level. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (ii) be readily removable from the area within the time available after flood warning.~~
- ~~8. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from a 100-year flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.~~
- ~~9. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.~~
- ~~10. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this Ordinance. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the 100-year flood. Proposals for subdivisions~~

~~(1) The structure shall not be used for human habitation.~~

~~(2) The structure shall be designed to have low flood damage potential.~~

~~(3) The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.~~

~~(4) The structure shall be firmly anchored to prevent flotation which may result in damage to other structures.~~

~~(5) The structure's service facilities such as electrical and heating equipment shall be elevated or floodproofed to at least one foot above the 100-year flood level.~~

~~b. Exemption from the 100-year flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.~~

~~12. Recreational Vehicles~~

~~a. Recreational vehicles are exempt from the requirements of Section III A5 of this Ordinance regarding anchoring and elevation of factory-built homes when the following criteria are satisfied.~~

~~(1) The recreational vehicle shall be located on the site for less than 180 consecutive days, and,~~

~~(2) The recreational vehicle must be fully licensed and ready for highway use. - ~~3. Action on Permit Application~~ The Administrator shall, within a reasonable time, make a determination as to whether the proposed floodplain development meets the applicable standards of this Ordinance and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefore. The Administrator shall not issue permits for variances except as directed by the City Council.
- ~~4. Construction and Use to be as Provided in Application and Plans~~ Floodplain Development Permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this Ordinance. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate, registered in the State of Iowa, that the finished fill, building floor elevations, floodproofing, or other flood protection measures

were accomplished in compliance with the provisions of this Ordinance, prior to the use or occupancy of any structure.

~~C. Variance~~

- ~~1. The City Council may authorize upon request in specific cases such variances from the terms of this Ordinance that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this Ordinance will result in unnecessary hardship. Variances granted must meet the following applicable standards:~~
 - ~~a. Variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.~~
 - ~~b. Variances shall not be issued within any designated floodway if any increase in flood levels during the 100-year flood would result. Consideration of the effects of any development on flood levels shall be based upon the assumption that an equal degree of development would be allowed for similarly situated lands.~~
 - ~~c. Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.~~
 - ~~d. In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this Ordinance, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.~~
 - ~~e. All variances granted shall have the concurrence or approval of the Department of Natural Resources.~~
- ~~2. Factors Upon Which the Decision of the Council Shall be Based—In passing upon applications for Variances, the Council shall consider all relevant factors specified in other sections of this Ordinance and:~~

TITLE VI

- a. ~~The danger to life and property due to increased flood heights or velocities caused by encroachments.~~
 - b. ~~The danger that materials may be swept on to other land or downstream to the injury of others.~~
 - c. ~~The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.~~
 - d. ~~The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.~~
 - e. ~~The importance of the services provided by the proposed facility to the City.~~
 - f. ~~The requirements of the facility for a floodplain location.~~
 - g. ~~The availability of alternative locations not subject to flooding for the proposed use.~~
 - h. ~~The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.~~
 - i. ~~The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.~~
 - j. ~~The safety of access to the property in times of flood for ordinary and emergency vehicles.~~
 - k. ~~The expected heights, velocity, duration, rate of rise and sediment transport of the flood water expected at the site.~~
 - l. ~~The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.~~
 - m. ~~Such other factors which are relevant to the purpose of this Ordinance.~~
3. ~~Conditions Attached to Variances — Upon consideration of the factors listed above, the Council may attach such conditions to the granting of variances as it deems necessary to further the purpose of this Ordinance. Such conditions may include, but not necessarily be limited to:~~

TITLE VI

- a. ~~Modification of waste disposal and water supply facilities.~~
- b. ~~Limitation of periods of use and operation.~~
- c. ~~Imposition of operational controls, sureties, and deed restrictions.~~
- d. ~~Requirements for construction of channel modifications, dikes, levees, and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this Ordinance.~~
- e. ~~Floodproofing measures.~~

8.05 ~~NONCONFORMING USES.~~

- A. ~~A structure or the use of a structure or premises which was lawful before the passage or amendment of this Ordinance, but which is not in conformity with the provisions of this Ordinance, may be continued subject to the following conditions:~~
 - 1. ~~If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this Ordinance.~~
 - 2. ~~Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.~~
- B. ~~If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the provisions of this Ordinance. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.~~

8.06 ~~PENALTIES FOR VIOLATION.~~

~~Violations of the provisions of this Ordinance or failure to comply with any of the requirements shall constitute a misdemeanor. Any person who violates this Ordinance or fails to comply with any of its requirements shall upon conviction thereof be fined not more than \$500.00 (five hundred) or imprisoned for not more than 30 (thirty) days. Nothing herein contained prevent the City of Rock Rapids from taking such other lawful action as is necessary to prevent or remedy violation.~~

2. Findings of Fact

- A. The flood hazard areas of the City of Rock Rapids are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.
- B. These flood losses, hazards, and related adverse effects are caused by: (i) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the floodplain causing increases in flood heights and velocities.
- C. This ordinance relies upon engineering methodology for analyzing flood hazards which is consistent with the standards established by the Department of Natural Resources.

3. Statement of Purpose

It is the purpose of this Ordinance to protect and preserve the rights, privileges and property of the City of Rock Rapids and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in Section 8.02(2)(A) of this Ordinance with provisions designed to:

TITLE VI

- A. Reserve sufficient floodplain area for the conveyance of flood flows so that flood heights and velocities will not be increased substantially.
- B. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.
- C. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.
- D. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.
- E. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

8.03 - General Provisions

1. Lands to Which Ordinance Apply

The provisions of this Ordinance shall apply to all lands and development which have significant flood hazards. The Flood Insurance Rate Map (FIRM) for Lyon County and Incorporated Areas, City of Rock Rapids, Panels 19119C0258D, 0259D, 0266D, and 0267D, dated September 24, 2021, which were prepared as part of the Lyon County Flood Insurance Study, shall be used to identify such flood hazard areas and all areas shown thereon to be within the boundaries of the base flood shall be considered as having significant flood hazards. The Flood Insurance Study for the County of Lyon County is hereby adopted by reference and is made a part of this ordinance for the purpose of administering floodplain management regulations.

2. Rules for Interpretation of Flood Hazard Boundaries

The boundaries of the Special Flood Hazard areas shall be determined by scaling distances on the official Flood Insurance Rate Map. Where uncertainty exists with respect to the precise location of the base flood boundary, the location shall be determined on the basis of the base flood elevation at the particular site in question. When an interpretation is needed as to the exact location of a boundary, the City Administrator shall make the necessary interpretation. The City Council shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the City Administrator in the enforcement or administration of this Ordinance.

3. Compliance

No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this Ordinance and other applicable regulations which apply to uses within the jurisdiction of this Ordinance.

4. Abrogation and Greater Restrictions

TITLE VI

It is not intended by this Ordinance to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this Ordinance imposes greater restrictions, the provision of this Ordinance shall prevail. All other ordinances inconsistent with this Ordinance are hereby repealed to the extent of the inconsistency only.

5. Interpretation

In their interpretation and application, the provisions of this Ordinance shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.

6. Warning and Disclaimer of Liability

The standards required by this Ordinance are considered reasonable for regulatory purposes. This Ordinance does not imply that areas outside the designated areas of significant flood hazard will be free from flooding or flood damages. This Ordinance shall not create liability on the part of the City of Rock Rapids or any officer or employee thereof for any flood damages that result from reliance on this Ordinance or any administrative decision lawfully made there under.

7. Severability

If any section, clause, provision or portion of this Ordinance is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this Ordinance shall not be affected thereby.

8.04 - Administration

1. Appointment, Duties and Responsibilities of Local Official

- A. The City Administrator is hereby appointed to implement and administer the provisions of this Ordinance and will herein be referred to as the Administrator.
- B. Duties and responsibilities of the Administrator shall include, but not necessarily be limited to the following:
 - 1) Review all floodplain development permit applications to assure that the provisions of this Ordinance will be satisfied.
 - 2) Review floodplain development applications to assure that all necessary permits have been obtained from federal, state and local governmental agencies including approval when required from the Department of Natural Resources for floodplain construction.
 - 3) Record and maintain a record of (i) the elevation (in relation to North American Vertical Datum 1988) of the lowest floor (including basement) of all new or substantially improved structures or (ii) the elevation to which new or substantially improved structures have been floodproofed.

TITLE VI

- 4) Notify adjacent communities/counties and the Department of Natural Resources prior to any proposed alteration or relocation of a watercourse and submit evidence of such notifications to the Federal Emergency Management Agency.
- 5) Keep a record of all permits, appeals and such other transactions and correspondence pertaining to the administration of this Ordinance.
- 6) Submit to the Federal Insurance Administrator an annual report concerning the community's participation, utilizing the annual report form supplied by the Federal Insurance Administrator.
- 7) Notify the Federal Insurance Administrator of any annexations or modifications to the community's boundaries.
- 8) Review subdivision proposals to ensure such proposals are consistent with the purpose of this ordinance and advise the City Council of potential conflict.
- 9) Maintain the accuracy of the community's Flood Insurance Rate Maps when;
 - a. Development placed within the floodway results in any of the following:
 - (i) An increase in the Base Flood Elevations, or
 - (ii) Alteration to the floodway boundary
 - b. Development placed in Zones A, AE, AH, and A1-30 that does not include a designated floodway that will cause a rise of more than one foot in the base elevation;
or
 - c. Development relocates or alters the channel.

Within 6 months of the completion of the development, the applicant shall submit to FEMA all scientific and technical data necessary for a Letter of Map Revision.
- 10) Perform site inspections to ensure compliance with the standards of this Ordinance.
- 11) Forward all requests for Variances to the City Council for consideration. Ensure all requests include the information ordinarily submitted with applications as well as any additional information deemed necessary to the City Council.

2. Floodplain Development Permit

- A. Permit Required - A Floodplain Development Permit issued by the Administrator shall be secured prior to any floodplain development (any man-made change to improved and unimproved real estate, including but not limited to buildings or other structures, mining, filling, grading, paving, storage of materials and equipment, excavation or drilling operations), including the placement of factory-built homes.

TITLE VI

- B. Application for Permit - Application shall be made on forms furnished by the Administrator and shall include the following:
- 1) Description of the work to be covered by the permit for which application is to be made.
 - 2) Description of the land on which the proposed work is to be done (i.e., lot, block, track, street address or similar description) that will readily identify and locate the work to be done.
 - 3) Location and dimensions of all structures and additions

- C. Action on Permit Application - The Administrator shall, within a reasonable time, make a determination as to whether the proposed floodplain development meets the applicable standards of this Ordinance and shall approve or disapprove the application. For disapprovals, the applicant shall be informed, in writing, of the specific reasons therefore. The Administrator shall not issue permits for variances except as directed by the City Council.
- D. Construction and Use to be as Provided in Application and Plans - Floodplain Development Permits based on the basis of approved plans and applications authorize only the use, arrangement, and construction set forth in such approved plans and applications and no other use, arrangement or construction. Any use, arrangement, or construction at variance with that authorized shall be deemed a violation of this Ordinance. The applicant shall be required to submit certification by a professional engineer or land surveyor, as appropriate, registered in the State of Iowa, that the finished fill, structure floor elevations, floodproofing, or other flood protection measures were accomplished in compliance with the provisions of this Ordinance, prior to the use or occupancy of any structure.

8.05 - Floodplain Management Standards

1. General Floodplain Standards

TITLE VI

All development must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where base flood elevations have not been provided in the Flood Insurance Study, the Iowa Department of Natural Resources shall be contacted to determine (i) whether the land involved is either wholly or partly within the floodway or floodway fringe and (ii) the base flood elevation. Until a regulatory floodway is designated, no development may increase the Base Flood Elevation more than one (1) foot. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

Review by the Iowa Department of Natural Resources is not required for the proposed construction of new or replacement bridges or culverts where (i) the bridge or culvert is located on a stream that drains less than two (2) square miles, and (ii) the bridge or culvert is not associated with a channel modification that constitutes a channel change as specified in 567-71.2(2), Iowa Administrative Code.

A. All development within the special flood hazard areas shall:

- 1) Be designed and adequately anchored to prevent flotation, collapse or lateral movement.
- 2) Use construction methods and practices that will minimize flood damage.
- 3) Use construction materials and utility equipment that are resistant to flood damage.

B. Residential structures - All new or substantially improved residential structures shall have the lowest floor, including basement, elevated a minimum of one (1) foot above the base flood elevation. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the base flood elevation and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers or extended foundations) may be allowed, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding.

All new residential structures located in areas that would become isolated due to flooding of surrounding ground shall be provided with a means of access that will be passable by wheeled vehicles during the base flood. However, this criterion shall not apply where the Administrator determines there is sufficient flood warning time for the protection of life and property. When estimating flood warning time, consideration shall be given to the criteria listed in 567-75.2(3), Iowa Administrative Code.

Non-residential structures - All new or substantially improved non-residential structures shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the base flood elevation, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are

TITLE VI

C. adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the base flood; and that the structure, below the base flood elevation is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are floodproofed shall be maintained by the Administrator.

D. All new and substantially improved structures:

- 1) Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must either be certified by a registered professional engineer or meet or exceed the following minimum criteria:
 - a. A minimum of two (2) openings, with positioning on at least two (2) walls, having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.
 - b. The bottom of all openings shall be no higher than one foot above grade.
 - c. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

- 2) New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.
- 3) New and substantially improved structures shall be constructed with electric meter, electrical service panel box, hot water heater, heating, air conditioning, ventilation equipment (including ductwork), and other similar machinery and equipment elevated (or in the case on non-residential structures, optionally floodproofed to) a minimum of one (1) foot above the base flood elevation.
- 4) New and substantially improved structures shall be constructed with plumbing, gas lines, water/gas meters and other similar service utilities either elevated (or in the case of non-residential structures, optionally floodproofed to) a minimum of one (1) foot above the base flood elevation or designed to be watertight and withstand inundation to such a level.

E. Factory-built homes:

TITLE VI

- 1) All new and substantially improved factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the base flood elevation.
- 2) All new and substantially improved factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors. Anchorage systems may include, but are not limited to, use of over-the-top or frame ties to ground anchors as required by the State Building Code.

F. Utility and Sanitary Systems:

- 1) On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.
- 2) All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the base flood elevation.
- 3) New or replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot above the base flood elevation.
- 4) Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.

G. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the base flood elevation. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (ii) be readily removable from the area within the time available after flood warning.

H. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from the base flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.

I. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.

TITLE VI

J. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this Ordinance. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the base flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include base flood elevation data for those areas located within the Special Flood Hazard Area.

K. Accessory Structures to Residential Uses

- 1) Detached garages, sheds, and similar structures that are incidental to a residential use are exempt from the base flood elevation requirements where the following criteria are satisfied:
 - a. The structure shall be designed to have low flood damage potential. Its size shall not exceed 600 sq. ft. in size. Those portions of the structure located less than 1 foot above the base flood elevation must be constructed of flood-resistant materials.
 - b. The structure shall be used solely for low flood damage potential purposes such as vehicle parking and limited storage. The structure shall not be used for human habitation.
 - c. The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.
 - d. The structure shall be firmly anchored to resist flotation, collapse and lateral movement.
 - e. The structure's service facilities such as electrical and heating equipment shall be elevated or floodproofed to at least one foot above the base flood elevation.
 - f. The structure's walls shall include openings that satisfy the provisions of Section 8.05(1)(D)(1) of this Ordinance.
- 2) Exemption from the base flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.

L. Recreational Vehicles

- 1) Recreational vehicles are exempt from the requirements of Section 8.05(1)(E) of this Ordinance regarding anchoring and elevation of factory-built homes when the following criteria are satisfied:
 - a. The recreational vehicle shall be located on the site for less than 180 consecutive days, and,

TITLE VI

- b. The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.
- 2) Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of Section 8.05(1)(E) of this Ordinance regarding anchoring and elevation of factory-built homes.
- M. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.
- N. Maximum Damage Potential Development – All new or substantially improved maximum damage potential development shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the elevation of the 500-year flood, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 0.2% annual chance flood; and that the structure, below the 0.2% annual chance flood elevation is watertight with walls substantially impermeable to the passage of water. A record of the certification indicating the specific elevation (in relation to North American Vertical Datum 1988) to which any structures are floodproofed shall be maintained by the Administrator. Where 0.2% chance flood elevation data has not been provided in the Flood Insurance Study, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determinations.

2. Special Floodway Provisions

In addition to the General Floodplain Standards, development within the floodway must meet the following applicable standards. The floodway is that portion of the floodplain which must be protected from developmental encroachment to allow the free flow of flood waters. Where floodway data has been provided in the Flood Insurance Study, such data shall be used to define the floodway. Where no floodway data has been provided, the Department of Natural Resources shall be contacted to provide a floodway delineation. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

- A. No development shall be permitted in the floodway that would result in any increase in the base flood elevation. Consideration of the effects of any development on flood levels shall be based upon the assumption that an equal degree of development would be allowed for similarly situated lands.
- B. All development within the floodway shall:

TITLE VI

- 1) Be consistent with the need to minimize flood damage.
 - 2) Use construction methods and practices that will minimize flood damage.
 - 3) Use construction materials and utility equipment that are resistant to flood damage.
- C. No development shall affect the capacity or conveyance of the channel or floodway of any tributary to the main stream, drainage ditch or any other drainage facility or system.
- D. Structures, buildings, recreational vehicles, and sanitary and utility systems, if permitted, shall meet the applicable General Floodplain standards and shall be constructed or aligned to present the minimum possible resistance to flood flows.
- E. Structures, if permitted, shall have a low flood damage potential and shall not be for human habitation.
- F. Storage of materials or equipment that are buoyant, flammable, explosive or injurious to human, animal or plant life is prohibited. Storage of other material may be allowed if readily removable from the floodway within the time available after flood warning.
- G. Watercourse alterations or relocations (channel changes and modifications) must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.
- H. Any fill allowed in the floodway must be shown to have some beneficial purpose and shall be limited to the minimum amount necessary.
- I. Pipeline river or stream crossings shall be buried in the streambed and banks or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering or due to the action of flood flows.

8.06 - Variance Procedures

1. The City Council may authorize upon request in specific cases such variances from the terms of this Ordinance that will not be contrary to the public interest where, owing to special conditions, a literal enforcement of the provisions of this Ordinance will result in unnecessary hardship. Variances granted must meet the following applicable standards.
 - A. Variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.

TITLE VI

- B. Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood would result. Consideration of the effects of any development on flood levels shall be based upon the assumption that an equal degree of development would be allowed for similarly situated lands.
 - C. Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
 - D. In cases where the variance involves a lower level of flood protection for structures than what is ordinarily required by this Ordinance, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.
 - E. All variances granted shall have the concurrence or approval of the Department of Natural Resources.
2. Factors Upon Which the Decision of the City Council Shall be Based - In passing upon applications for Variances, the Council shall consider all relevant factors specified in other sections of this Ordinance and:
- A. The danger to life and property due to increased flood heights or velocities caused by encroachments.
 - B. The danger that materials may be swept on to other land or downstream to the injury of others.
 - C. The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.
 - D. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.
 - E. The importance of the services provided by the proposed facility to the City.
 - F. The requirements of the facility for a floodplain location.
 - G. The availability of alternative locations not subject to flooding for the proposed use.
 - H. The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.
 - I. The relationship of the proposed use to the comprehensive plan and floodplain management program for the area.
 - J. The safety of access to the property in times of flood for ordinary and emergency vehicles.

TITLE VI

- K. The expected heights, velocity, duration, rate of rise and sediment transport of the flood water expected at the site.
 - L. The cost of providing governmental services during and after flood conditions, including maintenance and repair of public utilities (sewer, gas, electrical and water systems), facilities, streets and bridges.
 - M. Such other factors which are relevant to the purpose of this Ordinance.
3. Conditions Attached to Variances - Upon consideration of the factors listed above, the City Council may attach such conditions to the granting of variances as it deems necessary to further the purpose of this Ordinance. Such conditions may include, but not necessarily be limited to:
- A. Modification of waste disposal and water supply facilities.
 - B. Limitation of periods of use and operation.
 - C. Imposition of operational controls, sureties, and deed restrictions.
 - D. Requirements for construction of channel modifications, dikes, levees, and other protective measures, provided such are approved by the Department of Natural Resources and are deemed the only practical alternative to achieving the purpose of this Ordinance.
 - E. Floodproofing measures shall be designed consistent with the flood protection elevation for the particular area, flood velocities, duration, rate of rise, hydrostatic and hydrodynamic forces, and other factors associated with the regulatory flood. The Council shall require that the applicant submit a plan or document certified by a registered professional engineer that the floodproofing measures are consistent with the regulatory flood protection elevation and associated flood factors for the particular area.

8.07 - Nonconforming Uses

- 1. A structure or the use of a structure or premises which was lawful before the passage or amendment of this Ordinance, but which is not in conformity with the provisions of this Ordinance, may be continued subject to the following conditions:
 - A. If such use is discontinued for six (6) consecutive months, any future use of the building premises shall conform to this Ordinance.
 - B. Uses or adjuncts thereof that are or become nuisances shall not be entitled to continue as nonconforming uses.

If any nonconforming use or structure is destroyed by any means, including flood, it shall not be reconstructed if the cost is more than fifty (50) percent of the market value of the structure before the damage occurred, unless it is reconstructed in conformity with the

TITLE VI

- A. provisions of this Ordinance. This limitation does not include the cost of any alteration to comply with existing state or local health, sanitary, building or safety codes or regulations or the cost of any alteration of a structure listed on the National Register of Historic Places, provided that the alteration shall not preclude its continued designation.
2. Except as provided in Section 8.07(1)(B), any use which has been permitted as a Variance shall be considered a conforming use.

8.08 - Penalties for Violation

Violations of the provisions of this Ordinance or failure to comply with any of the requirements shall constitute a misdemeanor. Any person who violates this Ordinance or fails to comply with any of its requirements shall upon conviction thereof be fined not more than \$500.00 (five hundred dollars) or imprisoned for not more than 30 (thirty) days. Nothing herein contained prevent the City of Rock Rapids from taking such other lawful action as is necessary to prevent or remedy violation.

8.09 - Amendments

The regulations and standards set forth in this Ordinance may from time to time be amended, supplemented, changed, or repealed. No amendment, supplement, change, or modification shall be undertaken without prior approval of the Department of Natural Resources.

Section 2. Repealer. Ordinance No. 682 and all other Ordinances or parts of Ordinances in conflict with the provisions of this Ordinance are hereby repealed as of the effective date of this Ordinance.

Section 3. Severability. If any section, provision or part of this Ordinance shall be adjudged invalid or unconstitutional, such adjudication shall not affect the validity of the ordinance as a whole or any section, provision or part thereof not adjudged invalid or unconstitutional.

Section 4. Effective Date. This Ordinance shall become effective from and after September 24, 2021, which is the effective date of the new Flood Insurance Rate Map for the City of Rock Rapids, Lyon County, Iowa, provided that its final passage and publication as provided by law have been completed.

ADOPTED AND PASSED by the City Council this 12th day of July, 2021.

1.03	Authorized Use Of Hydrants		

- 1.01 MANDATORY CONNECTIONS. All residences and business establishments within the city limits intended or used for human habitation, occupancy or use shall be connected to the public water supply if it is reasonably available and if the building is not furnished with pure and wholesome water from some other source.
(IAC, 470-30.3)
- 1.02 INJURING WATERWORKS PROPERTY. It shall be unlawful to break, injure, mar or deface, interfere with or disturb any building, machinery, apparatus, fixtures, hydrants, attachments, or appurtenances of the waterworks or any public or private hydrant or water trough, or stop-cock box, meter, water supply or service pipe or any part thereof, or deposit anything in any stop-cock box, or commit any act tending to obstruct or impair the intended use of any of the above mentioned property, without permission of the proper authorities or excepting cases herein or otherwise provided for by ordinance.
- 1.03 AUTHORIZED USE OF HYDRANTS. All hydrants erected for the purpose of extinguishing fires are hereby declared to be public hydrants. No person except a member of the fire department, or persons especially authorized by the utility trustees, and then only in the exercise of authority delegated by them, shall open any of said hydrants or attempt to draw water from same, or at any time attempt to uncover or remove any protection from or in any manner interfere with any of the hydrants. It is further especially forbidden for anyone to tie or hitch any animal or team to any hydrant.
- 1.04 OPENING HYDRANTS BY OTHERS. It shall be unlawful for any person authorized to open hydrants to delegate his authority to another, or let or suffer another person to take wrenches or tools furnished him, or suffer the same to be taken from a fire station except for the purposes strictly connected with the fire department.
- 1.05 WINTER EXCAVATION. It shall be unlawful to make any excavation in any street or highway within six (6) feet of any laid water pipe, while the ground is frozen, or dig up or uncover so as to expose to frost any of the water pipes or sewers of the city except by special permission of the water superintendent.
